DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Claims 1-6 in the reply filed on 11/19/2009 is acknowledged.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
3. Claim 5 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
4. Regarding Claim 5, Claim 5 recites the limitation "the racks" in line 3, which lacks sufficient antecedent basis because "at least one rack" had been claimed consistently throughout.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 1792

6. Claims 1-4 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by THOMAS (US 6,463,940).

7. Regarding Claim 1, THOMAS teaches a dishwasher (automated cleaning apparatus) comprising: a body having a washing chamber for washing dishes (inherently present where racks are); at least one rack 22 in the washing chamber; at least one reader unit (transceiver 25) for sensing information on dishes on the at least one rack; and a control unit (processor 26, col. 4 lines 16-29) for controlling operation of the dishwasher with reference to information on the dishes sensed at the reader unit.

8. Regarding Claim 2, THOMAS teaches to affix a transponder to the articles (col. 3 lines 33-37).

9. Regarding Claim 3, THOMAS teaches the information tag to include a RFID tag and the reader to include a RF reader (RFID reading system, col. 3 lines 18-32).

10. Regarding Claim 4, THOMAS teaches that the information tag to have at least one kind of information on a kind of the dish (type of article to be washed, col. 4 lines 59-66).

11. Claim 6 is considered taught because “a path for introduction of the dishes to the body” is sufficiently broad that any area where a dish may be moved through before introduction to the dishwasher body would read on this claimed limitation, including where 25 is, Fig. 1.

Art Unit: 1792

Claim Rejections - 35 USC § 103

12. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

13. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

14. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

15. Claims 5-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over THOMAS (US 6,463,940).

16. THOMAS is relied upon as described above in the rejection of Claim 1.

Art Unit: 1792

17. Claims 5-6 are directed to a reader unit being provided at different locations including the rack (which is also a path for introduction of the dishes to the body), which THOMAS does not appear to teach explicitly.

18. However, it would have been obvious to one of ordinary skill in the art at the time of the invention to locate the reader unit on the dish rack, because it has been held that rearranging parts of an invention involves only routine skill in the art. MPEP 2144.04(VI-C); *In re Japikse*, 86 USPQ 70.

19. Thus, it would have been obvious to one of ordinary skill in the art at the time of the invention to modify the dishwasher as taught by THOMAS and move the reader unit to different locations, including a dish rack, because it would still be able to perform the expected function of reading/sensing information on the dishes.
